

Autotrack Member Tracking

Use Autotrack to track your membership

Happy tracking for Autotrack

Member Tracking System is designed for use in the hectic environment of a daycare, community center or club environment. Tracking is the basic philosophy behind all data entry and report generation screens. Security features developed for this environment can also be used. The burden of data entry is minimized through flexible data entry screens that include many smart-formatting and/or auto-fill fields.

Features

The Member Tracking System has been designed to be as versatile as possible. The forms and reports are simple and relevant. You can track your members, their attendance and activity participation, charges and payments, medical needs, Outcome Measurements and more. The Member Tracking System will also track your staff and volunteer hours, certifications information and print time cards.

Minimum Hardware Requirements

The Minimum Hardware Requirements for the Member Tracking System version 7 and higher and Supporter Donation System version 5 and higher software packages are:

Pentium III with a clock speed of 900 MHz or Higher
