

Autotrack On Demand Delivery Order Note

Introduction

A Delivery Order (abbreviated D/O) is a document from a consignor, a shipper, or an owner of freight which orders the release of the transportation of cargo to another party. Or is a listing of complete goods to be sent to the customer from supplier. Usually the written order permits the direct delivery of goods to a warehouseman, carrier or other person who in the course of their ordinary business issues warehouse receipts or bills of lading. Before the delivery order created, an ordering instruction will be generated by the ordering parties (Customer/Sales Personnel) via the sales order module. Every company has their own way to generate their delivery order, transfer from Quotation, and transfer from Sales order and so on.

Common Problem

Transferring of document, picking up of goods will be the daily repeating task for stock picker. Routine and repeating task will cause the mistake happen without any intention, double

check, triple check, multiple checks is already routines for everyone, but the mistake still happened. To minimize the mistake from 1% to 0.01% from your yearly revenue will be our target for Autotrack Delivery Order solution. What Autotrack Delivery Order can do for you? ADO design base on latest Microsoft SQL technology with asp.net and C sharp programming. Once the requester created a Sales Order (SO) from their existing inventory system, stock keeper will be allow to browse the created SO online via the mobile computer. Data will be transfer wirelessly and user can browse the request data without bask to the main office to pick up the printed picking list. Stock picker will be start picking the item and directly scan in the item barcode as well as quantity. In the event the stock picked is not the same with the requester item, error message will prompt to picker to pick the correct item. And in the event quantity pick not the same as requester quantity but the picker force the system to accept the picking task, Autotrack monitor lizard will alert the requestor at the PC site.

Autotrack On Demand Delivery Order Note
