Autotrack On Demand Delivery Return

Introduction

Delivery Return (abbreviated D/R) is a self generated document from an owner of freight which orders to receive back the goods into store. Every company has their own way to generate their delivery return, and after implementation of GST in our country, the usage of Delivery Return have become lesses.

Common Problem

Transferring of document, returning of goods will be the daily repeating task for stock picker. Routine and repeating task will cause the mistake happen without any intention. Double check, triple check, multiple checks is already routines for everyone, but the mistake still happened. To minimize the mistake from 1% to 0.01% from your yearly revenue will be our target for Autotrack On Demand Delivery reutrn solution.

What Autotrack Delivery Return can do for you?

Autotrack On Demand Delivery reutrn design base on latest Microsoft SQL technology with asp.net and C sharp programming. Store keeper will be allow to enter the Customer Previous DO online via the mobile computer. Data will be transfer wirelessly and user can browse the request data without going back to the main office to pick up the printed picking list.

Stock returner will be start relocating the item and directly scan in the item barcode as well as quantity. And in the event quantity return more than delivery order quantity but the picker force the system to accept the picking task, Autotrack monitor lizard will alert the requestor at the PC site.
