

Autotrack On Demand Picking

Introduction

A Picking Process Document is a document from a requester to store agent on the item they required. Or is a listing of complete goods to be sent to the customer from supplier. Usually the written order by the requester to the store agent for picking activity with in the store. Sometime the request send via word or mouth.

Common Problem

Any human writing or talking over the air trend to give more untraceable history log. Any mistake happen will generate un-necessary misunderstanding between the worker. Chances for misreading, miscommunication is also higher for the event of manual message passing.
