Introduction

Purchase Return (abbreviated P/R) is a self generated document from an owner of freight which orders to return back the goods to supplier. Every company has their own way to generate their purchase return, and after implementation of GST in our country, the usage of purchase return have become more critical.

Common Problem

Transferring of document, returning of goods will be the daily repeating task for stock picker. Routine and repeating task will cause the mistake happen without any intention. Double check, triple check, multiple checks is already routines for everyone, but the mistake still happened. To minimize the mistake from 1% to 0.01% from your yearly revenue will be our target for Autotrack On Demand Purchase Delivery return solution.

What Autotrack Purchase Return can do for you?

Autotrack On Demand Purchase return design base on latest Microsoft SQL technology with asp.net and C sharp programming. Store keeper will be allowing to enter the Supplier Previous DO online via the mobile computer or desktop computer. Data will be transfer wirelessly and user can browse the request data without going back to the main office to pick up the printed picking list.

Stock returner will be start relocating the item and directly scan in the item barcode as well as quantity. And in the event quantity return more than delivery order quantity but the picker force the system to accept the picking task, Autotrack monitor lizard will alert the requestor at the PC site.
