

EM-100T LONG RANGE CONTACTLESS READER

EM100T is long range contactless reader with frequency is 125KHZ , Professional designed to read TK4001 , output through Weigan26, Weigan34, Weigan42, ABA TRACK2 10digit , ABA TRACK2 14digit or RS232. After read the information then output through DATA0 , DATA1 , CP and RS232.

1. Product specification :

Model	EM-100T
Operating frequency	AM 125KHZ
Readable range	Long Range Clamshell Card 100CM ± 10%

2. Technical parameter :

Operating voltage	VCC=12V
Consumption current	200mA(12V) MAX

3. Advantage of EM100T :

In the present market, the most quality problem of reader is unstable, the readable range will shorten or have no reaction after a period use, it is inconvenient for user. EM100T produced on the basis of stability, use life and anti-jamming, every reader should test under high temperature for 72 hours to guarantee the quality.
