

Introduction

For those who are interested in buying reliable LCD touch screens, they are in luck! Tysson's PPD series offers high-quality, durable LCD touch screens that come with a steady aluminum die-casting base. Unlike other touch screen monitors, the PPDs are designed with the ability to integrate with any POS peripheral devices, such as pole display, card reader and second monitor, making it the ideal solution for retailers to assemble their own integrated cash register.

Feature

- Wide tilting range 15~80 degrees
- Power adapter hidden on base.
- Spill proof design
- Dock only model: PPD-1000 (without monitor)
- Touch panel interfaces: USB or Serial.
- Optional MSR, rear fixed or pole type VFD, speakers
- MSR interfaces: USB, PS2 or Serial.
- Steady aluminum die-casting base with VESA 75mm mounting hole
