#### S60 SERIES

The S60 series, standard 50x50x15 mm compact housing, offers all the most advanced optic functions, as well as the universal, available with safety class 1 laser emission. The series presents a complete range of models, including retroreflex with coaxial optics and polarisation filters for the detection of shiny and/or transparent objects, background suppression, contrast sensors with white light emission for the detection of coloured marks, the sensor with UV emission for the detection of luminescence references and the distance sensor with analogue output. The basic models for presence detection present trimmer sensitivity adjustment, while the models with the advanced optics are microprocessor controlled and have the patent-covered EASYtouch™ setting, which gives rapid and precise setting of the switching threshold, with the possibility of remote control, keyboard block and selection of the output delay function. The S60 series offers versions with cable or M12 connection that can be rotated for either straight or right-angle positions. All versions have NPN or PNP output and standard configuration conforming to the EN 60947-5-2 standard.

#### HIGHLIGHTS

- · Complete range of optic functions, basic, advanced and laser class 1
- · Models with coaxial optics for polarised retroreflex, contrast and luminescence sensors
- Trimmer or EASYtouch™ setting with Remote, Keylock and Delay functions
- · Standard cable or M12 connection with standard NPN or PNP configuration

### **APPLICATIONS**

Ceramics

**Beverage & Bottling** 

**Transportation lines** 

**Packaging lines** 

### **G/F INFRARED EMISSION**

The detection system with two separate emitter and receiver units allows the user to reach larger operating distances. The trimmer, present on the receiver, allows to adjust sensitivity and to detect objects that obscure, even partially, the light emission. The IR emission is modulated to avoid interference with other light sources and can be turned off to test the functioning even without the object to detect.

#### **ACCESSORIES**

For dedicated accessories refer to the ACCESSORIES section of this catalogue.

Refer also to Connectors and Fixing brackets of the General Catalogue.

#### **DIMENSIONS**

#### **INDICATORS AND SETTINGS**

A Output status and stability LEDs (receiver); power on LED (emitter)

Adjustment trimmer (receiver)

C M12 connector output

D Cable output

Single-turn trimmer for sensitivity adjustment. Rotate clockwise to increase the operating distance.

#### **DETECTION DIAGRAMS**

### L-G/F RED EMISSION

The high operating distance, typical of the emitter and receiver system, is notably increased thanks to the use of visible red laser emission. The laser beam can be easily aligned and offers excellent detection resolution of even small objects. The class 1 laser emission, according to EN 60825-1, guarantees maximum safety for the operators in all applications.

#### **ACCESSORIES**

For dedicated accessories refer to the ACCESSORIES section of this catalogue.

Refer also to Connectors and Fixing brackets of the General Catalogue.

### **DIMENSIONS**

#### **INDICATORS AND SETTINGS**

Single-turn trimmer for sensitivity adjustment. Rotate clockwise direction to increase the operating distance. Decrease sensitivity to increase resolution.

### **DETECTION DIAGRAMS**

### **B RED EMISSION**

With retroreflex sensors the object is detected when it interrupts the light beam generated between the sensor and its associated prismatic reflector. High-polarisation optic filters also allow reliable detection of very reflective objects, such as mirrored surfaces that, differently from the prismatic reflector, reflect the light beam without rotating the polarisation plane.

### **DIMENSIONS**

#### **DETECTION DIAGRAMS**

Reference standard:

Recommended operating distance

Maximum operating distance

High efficiency reflectors can be used to obtain larger operating distances.
Refer to **Reflectors** (A.01) of the **General Catalogue**.

### **L-B RED EMISSION**

The visible red laser emission increases the operating distance and resolution of the polarised retroreflex sensor. Specific R7 or R8 reflectors with 0.8 mm micro-prisms are available for high-resolution detection of small objects. The class 1 laser emission, according to EN 60825-1, guarantees maximum safety for the operators in all applications.

### **DIMENSIONS**

#### **INDICATORS AND SETTINGS**

- A Output status and stability LEDs
- B Adjustment trimmer
- C M12 connector output
- D Cable output

Single-turn trimmer for sensitivity adjustment. Rotate in a clockwise direction to increase the operating distance. Decrease sensitivity to increase resolution.

### **DETECTION DIAGRAMS**

Operating distance

High efficiency reflectors can be used to obtain larger operating distances. Refer to **Reflectors** (A.01) of the **General Catalogue.** 

### **B RED EMISSION**

The polarised retroreflex sensor with a coaxial optics offers the best resolution of the detection point as the optic emitting axis coincides with the optic receiving axis. The coaxial system also allows to reduce drastically the sensor's blind zone and consents the detection of objects very close to the sensor's frontal lens.

### **DIMENSIONS**

### **INDICATORS AND SETTINGS**

- A Output status and stability LEDs
- B Adjustment trimmer
- C M12 connector output
- D Cable output

Single-turn trimmer for sensitivity adjustment. Rotate in a clockwise direction to increase the operating distance.

### **ACCESSORIES**

For **dedicated accessories** refer to the **ACCESSORIES section** of this catalogue.

### **DETECTION DIAGRAMS**

High efficiency reflectors can be used to obtain larger operating distances. Refer to **Reflectors** (A.01) of the **General Catalogue.** 

Maximum operating distance

### T RETROREFLEX

The high sensitivity and reduced hysterisis of this retroreflex sensor allow to detect even the slightest attenuation of the received light emission, caused by the presence of transparent objects, such as glass or PET bottles or plastic film sheets for packaging. The presence of polarisation filters avoids false switching on shiny surfaces and the coaxial optics improves the detection precision on the entire operating range.

#### **DIMENSIONS**

### **INDICATORS AND SETTINGS**

- A Output status LED
- B Adjustment trimmer
- M12 connector output
- D Cable output

Single-turn trimmer for sensitivity adjustment. Rotate clockwise direction to increase the operating distance.

#### **ACCESSORIES**

| S60-PA-5-T51-NN          | 956201250 | NPN |
| S60-PA-5-T51-PP          | 956201100 | PNP |

All the ordering codes and information are summarised in the last pages of this catalogue.

### **DETECTION DIAGRAMS**

Recommended operating distance

Maximum operating distance

### **C DIFFUSE PROXIMITY**

This diffuse proximity sensor represents a reliable, simple and cost-effective solution for the direct detection of any object within the operating distance, that can be set using the sensitivity adjustment trimmer.. The visible red emission facilitates the alignment of the sensor or of the object to detect and in particular in short operating distances.

#### **DIMENSIONS**

### **INDICATORS AND SETTINGS**

- A Output status LED
- B Adjustment trimmer
- M12 connector output
- D Cable output

Single-turn trimmer for sensitivity adjustment. Rotate clockwise direction to increase the operating distance.

#### **ACCESSORIES**

For **dedicated accessories** refer to the **ACCESSORIES section** of this catalogue.

### **DETECTION DIAGRAMS**

Recommended operating distance
Maximum operating distance

### C LONG DIFFUSE PROXIMITY

This version of diffuse proximity sensor offers the maximum operating distance for the direct detection of objects, without the use of separate reflectors or receivers. The detection distance can be set using the sensitivity adjustment trimmer. The green stability LED indicates that the received signal is higher than the minimum signal for stable output switching.

#### **DIMENSIONS**

#### **INDICATORS AND SETTINGS**

- A Output status and stability LED
- B Adjustment trimmer
- M12 connector output
- D Cable output

Single-turn trimmer for sensitivity adjustment. Rotate clockwise direction to increase the operating distance.

#### **ACCESSORIES**

For **dedicated accessories** refer to the **ACCESSORIES section** of this catalogue.

### **DETECTION DIAGRAMS**

Recommended operating distance

Maximum operating distance

### **L-C RED EMISSION**

The visible red laser emission allows the accurate detection of very small objects. The sensors operate as a proximity device up to 60 cm and can be used as a contrast sensor for high contrast mark detection. The class 1 laser emission, according to EN 60825-1, guarantees maximum safety for the operators in all applications.

#### **DIMENSIONS**

## **SELECTION TABLE**

| axial optics - 2 m cable |           |     |
|--------------------------|-----------|-----|
| S60-PL-2-C01-NN          | 956201640 | NPN |
| S60-PL-2-C01-PP          | 956201650 | PNP |

| axial optics - M12 connector |           |     |  |
|------------------------------|-----------|-----|--|
| S60-PL-5-C01-NN              | 956201660 | NPN |  |
| S60-PL-5-C01-PP              | 956201670 | PNP |  |

All the ordering codes and information are summarised in the last pages of this catalogue.

### **DETECTION DIAGRAMS**

Operating distance

### **M RED EMISSION**

Background suppression proximity allows to precisely adjust the distance over which the object is not detected, with the minimum difference between different coloured objects. The EASYtouch setting procedure fixes automatically the best detection conditions with medium or high precision, simply pressing once the teach-in push-button, in presence of the background to suppress.

#### **DIMENSIONS**

### **INDICATORS AND SETTINGS**

- Output status and READY/ERROR LEDs
- B Teach-in push-button
- M12 connector output
- D Cable output

Teach-in button for setting.

EASYtouch™ provides two setting modes: standard or fine. Please refer to instructions manual for operating details.

#### **ACCESSORIES**

For **dedicated accessories** refer to the **ACCESSORIES section** of this catalogue.

Refer also to Connectors and Fixing brackets of the General Catalogue.

### L-M RED EMISSION

The background suppression with red laser emission offers the best precision in terms of resolution and for background suppression, over which the object is not detected.

The class 1 laser e m i s s i o n , a c c o r d i n g t o EN 60825-1, guarantees maximum safety for the operators in all applications.

#### **DIMENSIONS**

### **DETECTION DIAGRAMS**

Operating distance

### W RED EMISSION

The white light LED emission is designed for the detection of a large number of coloured or grey-scale contrasts, in order to detect print registration marks or similar. The patent-covered EASYtouch<sup>s</sup> setting procedures automatically selects the best detection conditions, simply by pressing the teach-in push-button once. A higher level of accuracy can be obtained or the dark/light operating mode can be inverted.

#### **DIMENSIONS**

#### **INDICATORS AND SETTINGS**

- A Output status and REA-DY/ERROR LEDs
- B Teach-in push-button
- M12 connector output orientable in two positions
- D Cable output

Teach-in button for setting.

EASYtouch™ provides two setting modes: standard or fine. Please refer to instructions manual for operating details.

#### **ACCESSORIES**

For **dedicated accessories** refer to the **ACCESSORIES section** of this catalogue.

All the ordering codes and information are summarised in the last pages of this catalogue.

# **DETECTION DIAGRAMS**

### **U UV EMISSION**

The UV light LED emission detects any luminescent reference, even on very reflective surfaces, such as ceramics, metal or mirrored glass. The patent-covered EASYtouch™ setting procedures fixes automatically the best detection conditions, simply by pressing the teach-in push-button once, with the reference to detect. The threshold between two different luminescence degrees can be set by a second pressure of the button

#### **DIMENSIONS**

#### **INDICATORS AND SETTINGS**

- A Output status and REA-DY/ERROR LEDs
- B Teach-in push-button
- M12 connector output orientable in two positions
- D Cable output

Teach-in button for setting.

EASYtouch™ provides two setting modes: standard or fine. Please refer to instructions manual for operating details.

#### **ACCESSORIES**

For **dedicated accessories** refer to the **ACCESSORIES section** of this catalogue.

| luminescence sensor - M12 connector |           |     |  |  |  |
|-------------------------------------|-----------|-----|--|--|--|
| S60-PA-5-U08-NH                     | 956201010 | NPN |  |  |  |
| S60-PA-5-U08-PH                     | 956201000 | PNP |  |  |  |

All the ordering codes and information are summarised in the last pages of this catalogue.

### **DETECTION DIAGRAMS**

### Y RED EMISSION

This sensor gives an analogue 0-10 Vdc output proportional to the target distance in the measurement range, with the possibility of setting a threshold for the other switching output. The yellow LED indicates the activation of the output during switching while the red LED turns on when the object is outside the measurement range.

### **DIMENSIONS**

#### **INDICATORS AND SETTINGS**

- A Output status and REA-DY/ERROR LEDs
- B Teach-in push-button
- M12 connector output orientable in two positions
- D Cable output

Teach-in button for setting.

EASYtouch™ provides two setting modes: standard or fine. Please refer to instructions manual for operating details.

#### **ACCESSORIES**

For **dedicated accessories** refer to the **ACCESSORIES section** of this catalogue.

Refer also to Connectors and Fixing brackets of the General Catalogue.

### **SELECTION TABLE**

| distance sensor - M12 connector |           |     |  |  |
|---------------------------------|-----------|-----|--|--|
| S60-PA-5-Y03-NV                 | 956201710 | PNP |  |  |
| S60-PA-5-Y03-PV                 | 956201700 | NPN |  |  |

All the ordering codes and information are summarised in the last pages of this catalogue.

### **DETECTION DIAGRAMS**

Operating distance

#### **TECHNOLOGY ADVANTAGES**

The S60 series establishes the new market standard in the compact  $50 \times 50$  mm fotoelectric sensors, offering a complete family of optic functions with only 15 mm housing width.

The standard dimensions, reduced housing width and the multi-hole fixing system make the **S60** series compatible with the majority of compact sensors present on the market.

#### **STANDARD 50 x 50 x 15 mm**

#### **COMPACT PHOTOELECTRIC SENSORS**

All the models are available in cable or M12 connector versions, with NPN or PNP type static output, conforming to the EN 60947-5-2 European standard.

The M12 connector can be easily rotated to 90° and can be blocked in the straight or right-angle positions respect to the optic axis, the cable emerges at 45° and thanks to its flexibility can rotate pratically 360°. Thanks to these characteristics the sensor can be easily fixed on all sides and at all angles.

All the basic optic functions such as the through beam, polarised retroreflex, diffuse proximity and background suppression are available also in the version with visible red laser emission, with all the safety characteristics for the user in class 1 conforming to the EN 60825-1 European standard and in class II according to CDRH21 CFR Part 1040 USA standard.

Besides the evident advantages for the alignment of sensors and of the object to detect, thanks to the high spot visibility and concentration, the laser emissions offer an improved detection resolution, millimetric for the through beam and polarised retroreflex versions, or decimillimetric for the diffuse proximity and background suppression.

The polarised retroreflex model is available also in the coaxial optic version that, with the emitter optic axis coinciding with the receiver one, offers a better detection axis precision and the elimination of the blind zone near to the sensor.

#### **TECHNOLOGY ADVANTAGES**

The coaxial optics is present also in the polarised retroreflex model for the detection of transparent objects, notably increasing the performances of this optic function and its immunity to object movements inside the detection area.

The contrast sensor with white LED emission has an operating distance ranging from 17 to 21 mm and detects coloured or grey-scale marks, with a minimum dimension of 0.5 mm and an operating frequency reaching 5 kHz.

The luminescence sensor with UV LED emission has an operating distance ranging from 0 to 40 mm and detects fluorescent or luminescent targets, with a minimum dimension of 0.5 mm and an operating frequency reaching 2 kHz.

The setting of these sensors is extremely rapid and easy, thanks to the patent-covered **EASYtouch™** system that alllows to automatically fix the object detection threshold, with a single pressure of the teach-in push-button.

It is possibile to set the sensor to detect more critical differences between the mark and the background, or invert the dark or light operating mode, by pressing twice the push-button.

The EASYtouch™ system allows to select the 'Remote' function for the remote sensor setting through the cable or connector, the 'Keylock' function to block the keyboard, 'Delay OFF' function for the 20 ms timing of the output deactivation.

The sensor technology with background and/or foreground suppression of the **\$60** series has allowed to develop also a cost-effective distance sensor with a double output: a 0 - 10 V analogue output and a digital NPN or PNP switching output.

The measurement range and the switching threshold output can be selected in the 50 - 150 mm range, with a  $\pm$  1 mm precision; the direct or inverse proportionality and the light or dark operating mode can be selected.

### SMT chip-size for the electronic miniaturisation and more space for the optics

#### **COAXIAL OPTICS**

**BIAXIAL OPTICS** 

Complete external shield for high electromagnetic compatibility

### **ACCESSORIES**

The series is compatible with the following Datalogic Automation accessories (refer General Catalogue)

- CS connectors
- R reflectors

New accessories dedicated to the \$60 series have been developed to cover all the fixing requirements and improve functioning.

#### **ACCESSORY SELECTION AND ORDER INFORMATION**

| MODEL    | DESCRIPTION                             | ORDER N°  |
|----------|---|-----------|
