★ Why Choose FaceTrack?

- Zero manual effort
- Zero contact
- Latest hardware upgrades
- Powerful live insights
- Consistent, accurate attendance data
- Enhanced security and productivity

FaceTrack is a smart, contactless facial recognition presence system that transforms CCTV network into a real-time attendance and monitoring solution. It automatically identifies people as they move through your premises—without cards, fingerprint scanners, or manual check-ins. With continuous tracking, instant alerts, live dashboards, and automated attendance reports, FaceTrack enhances security, improves workforce efficiency, and reduces operational workload. Designed to integrate seamlessly with your current infrastructure, it offers a powerful, secure, and cost-effective way to modernize attendance and presence management across any organization.
