

Autotrack hosting services

Cloud hosting Services is an example of a platform as a service (PaaS). Like all hosting app services, this technology is designed to support applications that are scalable, reliable, and inexpensive to operate. In the same way that app service is hosted in the virtual world, so too is cloud services. However, you have more control over the application. You can install your own web application on this hosting that uses cloud services, and you can access them remotely. More control also means less ease of use. Unless you need the additional control options, it's typically quicker and easier to get a web application up and running in the Web Apps feature of App Service compared to other Cloud Services.

Feature

- Trouble free hosting
- Fully maintenance by ALC
- With 10GB data storage
- Come free with Microsoft SQL express Database
- Stable hosting plan

| Parameter | Specification |
|----------------------------------------------------------|---------------|
| Web Space | 10GB |
| MSSQL Space | 10 GB |
| Number of Site / IIS Entry | 1 |
| Domain Names | System assign |
| Bandwidth | 10GB/month |
| Static IP | excluded |
| SSL | excluded |
| Backup | excluded |
| Concurrent Connections | 256 |
| MSSQL 2019, 2017, 2016, 2014, 2012, 2008 express edition | included |
| Software maintenance | included |
| Hardware maintenance | excluded |
| Setup Fee | Included |
| Basic firewall | Included |
