

AGen Fleet Management Software

Smart Control. Complete Visibility. Cost Efficiency.

Modern organizations rely on vehicles to support daily operations. Our Fleet Management Software provides a centralized platform to **record, monitor, and manage all vehicles within your premises**, ensuring full visibility and operational control at all times.

Key Capabilities

- **Vehicle Parking & Location Tracking**
Know exactly where each vehicle is parked after use, improving accountability and asset utilization. Simplify vehicle retrieving process on daily vehicles exchange.
- **Service & Maintenance Monitoring**
Track service schedules and receive timely reminders to prevent breakdowns and reduce downtime.
- **Road Tax & Compliance Management**
Monitor Road tax expiration dates and stay compliant with regulatory requirements effortlessly.
- **Fuel Consumption Analysis**
Record and analyze monthly fuel usage to optimize costs and identify inefficiencies.

Key Benefits

- Centralized vehicle records and reporting
- Reduced Administrative Workload
- Improved cost control and operational efficiency
- Better planning and decision-making

Designed for organizations seeking reliability, transparency, and efficiency, our Fleet Management Software helps you **maximize fleet performance while minimizing risks and operating costs.**
