

AGen In Out Tracking Software

What is AGen In Out Tracking for replace excel spreadsheet in inventory control?

Introduction

AGen In-Out Tracking is a method used in inventory control to monitor the movement of items **into and out of** a storage location, such as a warehouse or stockroom. It's a more dynamic and accurate alternative to using static Excel spreadsheets, which can be prone to errors and lack real-time updates.

What Is In-Out Tracking?

In-Out Tracking records:

- **Inbound items** (stock received, returns, restocks)
- **Outbound items** (sales, shipments, usage)

Each transaction updates the inventory levels, providing a **real-time view** of stock availability.

Module inside AGen In Out tracking software

✅ Benefits AGen In Out tracking Over Excel Spreadsheets

Feature	Excel Spreadsheet	In-Out Tracking System
Real-time updates	❌ Manual key in	✅ Automatic with scanner
Error reduction	❌ Prone to human error	✅ Validated entries
Audit trail	❌ Limited	✅ Full transaction history
Multi-user access	❌ Difficult	✅ Cloud-based or centralized
Alerts & automation	❌ None	✅ Low stock alerts, reorder triggers

🔧 How It Works (Simplified)

- 1. Item Received**
 - System logs item ID, quantity, date/time, supplier info
 - Inventory increases
- 2. Item Issued or Sold**
 - System logs item ID, quantity, date/time, recipient/customer
 - Inventory decreases
- 3. Dashboard/Reports**
 - View current stock, movement history, trends, and alerts
