

## Autotrack on Demand Vehicle Tracking

### Introduction

Managing only one personal vehicle with yearly, quarterly or monthly routine servicing and document renewal sometime already make the vehicle owner skip their responsibility due to whatever reason. This task become more critical if someone required to manages more than one vehicle. Taking care of company vehicle especially becomes a non-consistent routine task for most of the admin clerk in the company to arrange servicing and renewal of document for company vehicle become much more difficult without proper recording system. Add on with daily tracking for driver who drives which vehicle also will be recorded for future investigation purposes. The vehicle manager would like to have an application can assist them in simplify this inconsistent repeating activity. Autotrack team understand on this tedious and non-consistent task, that why we design for you an tracking software, Autotrack on Demand Vehicle Tracking solution, make your tracking simple to use.

### What you can do with Autotrack on Demand Vehicle tracking?

This simple to use yet powerful tracking solution give you an easy way to manage your company vehicle as well and your vehicle's driver. You can use it for tracking the road tax expired date for your vehicle, Insurance and No Claim Bonus (NCB) for your individual vehicle, routine vehicle services, vehicle tire air pressure refill reminder, yearly car battery checking, commercial vehicle yearly inspection routine and any routine inspection required. At the same time, daily driver vehicle record can be obtained by just 2 simple touches on the reader.

### How to use Autotrack on demand Vehicle tracking

To make your tacking simple, Autotrack team have been design our software base on the most practical way of operation for admin clerk and vehicle driver to use, a series of procedure will be conduct to train the new user on how to use the vehicle tracking solution. Basically for admin clerk, she just needs to create the tracking information for the first time, when the time reaches, auto alert notification will be sending to her email inbox. For the vehicle driver, if they are driving the vehicle base on first come first serve method, the driver will be required to tag/scan their working ID together with key ID to record who the driver for the vehicle is on that particular date. This information is important for company investigate for any road offends in the future.

### Reporting and reminder

Monthly transaction reporting will be tabulate for driver versus vehicle for administration purposes. A report to view available vehicle belong to individual company, record of servicing as well as renewal reminder send to email of administrator or admin clerk for routine checkout purposes. With this reporting and reminder, Autotrack believe this software will be able to solve your management of vehicle problem in your company.
