

## **Equipment and Tools Tracking Make Easy with Autotrack Barcode solution**

Autotrack equipment or tools management with barcode is one of our invention for company to do their daily tracking activity. Barcode loan and return software solution for equipment and tools is design specifically for engineering firm to manage their equipment and consumable. Autotrack loan and return barcode management system monitors the issue and return of Kit Issue, Rental or Loan items. There are a large number of different engineering tools can be track within this general heading. The general principle is to identify each item that is going out on loan with a unique number that is then printed on barcode labels. On issue of the item the unique barcode is scanned and a proposed return date logged. The borrower information and the date and time of the borrowing period. Reports show what is in store and what is out on loan and powerful search facilities enable you to track the movement history of each item. Optional calculator module provides cost data for your invoicing system based on time the item is out and cost per unit of time. The system works with manual entry, tethered barcode scanners or portable terminals

**Honeywell**

### **Feature**

Track accurately engineering tools with 1D and 2D datamatrix barcode  
Audit employee with the tools borrows  
Return and issue and consumable tools records  
Easy to use  
Powerful reporting  
Barcode label ready with common barcode 128 and QRcode  
Powered with barcode printing software  
Date and time recoding  
Schedule and maintenance reminder  
Reorder level alert  
Overdue information

### **Advantages**

- Speed Up tools loan and return Process
- Improve Accuracy
- Track complete history on tools and Related Information
- Monitor Warranty and Lease Expiration
- Maintain Insurance Records
- Meet Audit Requirements

- Improve Depreciation Reporting
- Minimize Paper Work
- Create One Central Tools Repository
- Keep History of tools Use
- Optimized the engineering process.

## Application

Engineering Equipment Tracking

Office Rental Equipment Tracking

Event Organizer Equipment tracking

Exhibition Organizer

## Software System Requirements

The Honeywell powered engineering tools tracking software runs on these desktop PC operating systems:

Server

- ✓ ✓ Windows 2003 or windows 2008 or windows 2012

Client

- ✓ ✓ Personal Computer Windows 7 and above
- ✓ Tablet PC with web browser include Android or iOS.
