NX Series Beyond Expectations

NEXT GENERATION 4" & 6" INDUSTRIAL THERMAL PRINTERS

Flexible & Cost Effective

Simple-to-Operate

All-in-One

Plug-and-Play

www.satoasiapacific.com

The NX Series represents SATO's next generation of thermal printers with advanced support for barcode symbologies, character sets and RFID encoding. A product of SATO's global R&D network, the NX Series incorporates value-added features in a world-class design to deliver a printing solution that goes beyond expectations.

- LED indicator and color display alert operator to printer status. Guidance videos assist in error resolution and printer maintenance.
- Advanced user interface for full operational control of print, application, I/F, and system settings via front panel display
- · Customizable GUI content and security enabled menu access let administrators personalize the operator experience.
- Best in class 60° print head opening, tension damper, and coreless ribbon system facilitate easy media setup.
- Colored operator touch points ensure safe operation and interactions with movable parts.

Dynamic Integration

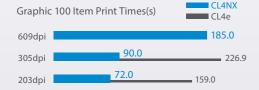

- Serial, parallel, LAN and USB combo interface covers all legacy and modern systems requirements. Optional WLAN available.
- SZPL, SIPL, SDPL, STCL command emulations enable direct replacement of printers in legacy applications.
- · Auto-switching interface setting and media auto-calibration to adjust sensor levels for faster setup time between print jobs.
- 30+ display languages, 40+ print character sets, and 15 SATO resident fonts, additional user downloadable space provide universal format
- All major agency approvals permit global deployment for large enterprises or future expansion potential for growing startups.

- · Metal casing including front panel and side covers protects against any industrial environment.
- · Die-cast Aluminium frame, print and ribbon mechanism provide solid stability to ensure print quality and printer durability.
- 1 year global warranty for printer including installed options. Long lasting 30 kilometer guaranteed print head and platen roller.

Accurate and Efficient Performance

- Head check function performs print head status analysis before each print to assure printing
- High speed data processing with 10 ips print speed equals faster first label out and print job throughput.
- 10 preset darkness levels with finite adjustment between presets for optimal print performance
- UHF and HF RFID* options support a wide variety of tags and include adjustable antenna system for optimal inlay encoding

Sustainable Innovation

- Coreless ribbon uptake simplifies the loading process. Thermal ribbon is now directly attached to ribbon spindle and removed via one-touch release button.
- •Superior energy efficiency certified by Energy Star the leader in product accreditation. Decrease energy costs without any sacrifice to functionality
- •Optional linerless kit eliminates waste associated with traditional label production. No liner equals either more labels per roll for increased productivity or smaller rolls sizes for decreased logistic and storage expenses.

Functional Form

- Bi-fold cover allows compact design and reduces workspace requirement.
- · Supports internal, external, clockwise and counter-clockwise rotational media types. Adjustable label holder for increased internal roll capacity.
- · Field installable options, snap in print head, and tool-less platen replacement minimize downtime.
- External media inlets, mounting fixtures, and cable hook

SATO Online Services

Cloud-based IoT solution to keep your operations running & visible

SATO monitors all your printers via cloud (for registered customers)

By keeping constant watch on printer status, SOS notifies operator when an expendable part needs replacement, and offers prompt and effective resolution to problems, reducing downtime significantly

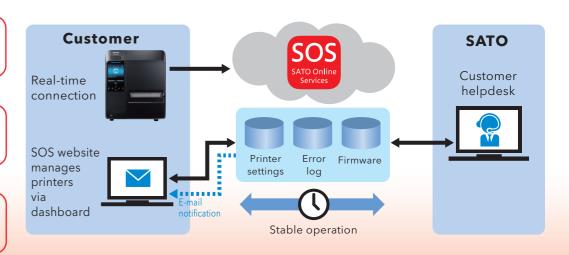

Cut 86% industrial printer downtime and 83% print & apply machine downtime! * *Based on survey conducted by SATO in Japan

Minimise downtime through proactive preventative maintenance

Keep all printers visible to achieve efficiency

with dashboard

Use SOS to manage all your IT assets on-site

NEW FEATURES

Standalone Printing

- AEP resides within printer, eliminates need for costly PC
- Takes up less space due to PC-less printing
- · Less downtime expected and parts to be maintained
- · Able to connect with peripheral devices such as a barcode scanner, numeric keypad and full-sized keyboard

Easy Barcode Check

- Compatible with 1D & 2D codes
- Standard function comes with 'Readable' and 'Comparison' modes
- Easy installation of stand kit and certified scanner (sold separately)
- · Able to print void mark on defective labels

Model Lineup

Cutter

- Front mount guillotine cutter unit
- · Single item or batch print job cut settings
- · Long lasting blade

Standard

- Tear-off bar for manual media separation
- Label holder adjustable to support up to 10" OD media rolls
- External media slots for rear or bottom feed applications

Dispenser

- Dispenser unit including peel bar for liner separation
- Additional internal line take-up for active pee applications
