

## CM900 RFID READER

CILICO CM900 RFID reader uses industry-leading RFID module impinj R2000. It has excellent read and write performance. 5700 mAh large capacity battery ensures adequate working power consumption. CM900 supports one-button switching between RFID reading and barcode scanning. It can be used alone or work with CILICO mobile terminals and consumer Android mobile phones of various brands to save your operating costs. CM900 is widely used in intelligent manufacturing, warehousing management, store inventory, asset management, logistics and transportation and other fields.
