PRINTERS

Printers for Self-Service Kiosks: for an Optimal User Experience.

More and more sectors are seeing the benefits of self-service terminals. **This trend is consistent with the new expectations of consumers** and particularly with their need for immediacy. They expect the service they are accessing to be provided **as quickly as possible**.

But that's not all—for a customer's experience to be optimal, it must **be complete**. This is also true in the area of **issuing cards**, whatever kind they may be (bank card, loyalty card, student card, access card, etc.), and where card printers for self-service kiosk terminals shine.

Increase Points of Contact at a Lower Cost

Increase the quality of service offered to customers or members.

Improved user satisfaction

- **Offer an immediate and easily accessible service**

Cards are personalized and issued to cardholders 24/7, regardless of business hours.

- **Give the option of personalizing cards**

Users can easily select the design of their card on the terminal, or even use a personal photograph.

- **Reduce waiting times**

Your contacts receive their card right away, without having to wait in line at the counter or for it to be mailed to them.

Streamline operating costs and reach more consumers.

Maximum return on investment

- **Optimize personnel costs**

The terminal frees up your employees' time so they can focus on tasks with a higher added value.

- **Limit maintenance costs**

The notification system, combined with the large capacity of the feeders and consumables, optimizes maintenance operations.

- **Generate additional revenue**

When a customer gets their card immediately, they are more likely to use it right away. They benefit immediately from the services associated with the card.

- **Project a modern & distinctive image**

The fact that you can get a card without waiting is perceived very positively by customers and allows you to stand out from competitors.

Many Advantages for Many Sectors

🕒 Governments & Administrations

- Accelerate certain administrative procedures
- Provide a local service for access to administrative services for the entire population

🕒 Finance

- Improve the user experience: instant account opening, emergency replacement of lost or stolen cards
- Increase the activation rate and encourage the use of issued bank cards

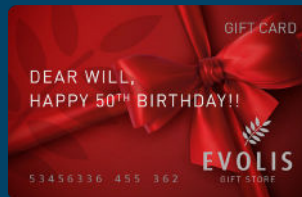

🕒 Education

- Facilitate the delivery of student cards at the beginning of the academic year or in case of loss
- Provide students with complete autonomy when collecting and using their multi-purpose card

🕒 Transport

- Optimize the flow of passengers
- Reduce non value-added tasks for staff

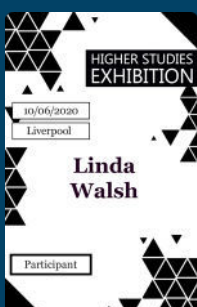

🕒 Retail

- Offer a service for personalized gift cards
- Easily issue cards for promotional campaigns

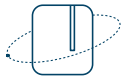

🕒 Healthcare

- Enable the identification of all persons present in the establishment: medical staff, patients, visitors
- Limit physical contact between people

🕒 Hospitality & Leisure

- Facilitate check-in by issuing cards directly from kiosk terminals
- Optimize the flow of visitors by automating the issuance of visitor badges, entry cards, passes, etc.

A Wide Range of Dedicated Products to Meet All Needs

KC RANGE | Compact models

KC Essential

The **most compact and modular solution** to meet your integration and personalization needs.

KC Prime

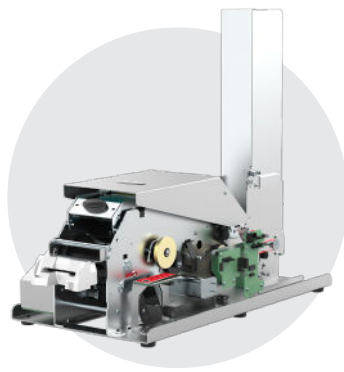

Our ready-to-integrate printer model, with a **200-card feeder**.

KC Max

A printer optimized to accommodate **four 100-card feeders** while remaining compact.

KM RANGE | High autonomy models

KM500B

A **high capacity 500-card feeder** to handle unique card designs.

KM2000B

Four 500-card feeders to autonomously manage up to 4 different card designs.

All the Benefits of our Kiosk Range

When it comes to facilitating its integration, offering the best possible personalization options, or optimizing its durability, **our Kiosk range has been designed to be easily adaptable to all projects.**

We also know that each project is unique, so you can count on our dedicated project team to meet your specific needs.

Integration

◎ Drivers for all major operating systems

- **Windows, Mac,** and **Linux** drivers are available for all products in our Kiosk range.

◎ Simplified hardware & software integration

- The **metal structure** of the printer allows it to be easily integrated into the terminal and ensures its stability.
- The **Evolis Premium SDK** (software development kit) allows you to optimize **integration and communication with your IT systems.**
- **2D & 3D side with dimensions.**

◎ Card management

- You choose the mode of **insertion, ejection, and rejection** of the cards.
- The **retraction function for uncollected cards** is available on all our printers.

◎ Illuminated bezel (optional for KC range)

- With its LEDs, **Evolis's illuminated bezel provides a visual alert to the user** of a card entry or exit.
- Its **optional anti-insertion system prevents the insertion of cards**, ensuring that the bezel only performs its function as a card output.

Personalization

◎ Electric personalization

- The printers can incorporate **encoders** for a magnetic strip, contact chip, and contactless chip. These **increase security** and can be combined with each other.

◎ High level of autonomy

- The Kiosk range offers **feeders with different capacities** from 100 to 2000 cards, depending on the level of autonomy required.
- **High-capacity ribbons** can print more than 3,000 single-sided cards in monochrome and 500 cards in color.

◎ Graphic customization

- Personalization can be done on **blank cards** by printing on the entire surface of the card, or on **pre-printed cards** by printing only certain areas

◎ Printing quality & speed

- The printers offer **high-resolution graphic rendering** thanks to dye sublimation and thermal transfer printing.
- Personalized cards are **printed in seconds.**

Durability

◎ Operating temperature & humidity level

- Special attention is paid to the endurance of our printers in order to **ensure optimal operation** in difficult environments and to **extend their life span.**

◎ Warranty

- All **Kiosk printers are guaranteed for 2 years.** Extended warranties are available for up to **4 years.**

RESOLUTION

- 300 dpi
- Extended mode:
 - 300x600 dpi: monochrome and color
 - 300x1200 dpi: monochrome only

- 300 dpi
- Extended mode:
 - 300x600 dpi: monochrome and color
 - 300x1200 dpi: monochrome only

CARD MANAGEMENT

- Evolis LED illuminated bezel (optional): manual insertion and return
- Anti-insertion system (optional on Evolis bezels)
- Possibility of integrating a non-Evolis feeder and/or bezel
- Ability to retract uncollected cards
- Reject slot for faulty cards

- Feeder capacity: 200 cards or 100 cards without metal cassette
- Return of cards to the terminal's output tray if there is no bezel
- Evolis LED illuminated bezel (optional): manual insertion and return
- Anti-insertion system (optional on Evolis bezels)
- Possibility of integrating a non-Evolis bezel
- Ability to retract uncollected cards
- Reject slot for faulty cards or output tray

CONNECTIVITY / PORTS

- USB (1.0, 1.1, 2.0, 3.0)
- Ethernet
- Serial port (option)

- USB (1.0, 1.1, 2.0, 3.0)
- Ethernet
