PM351

SLIMMED DOWN TO THE ESSENTIALS: SIMPLE, INTUITIVE, AND STURDY HANDHELD TERMINAL

Straightforward and comfortable design

The form factor of PM351 maximizes the comfort of gripping it with one hand so that the several hours of working won't get you tired so much anymore. The 4.0in display with the capacitive touch is bright and daylight readable. Below the screen is the keypad for the easier yet more accurate data input, including the big orange scan button and power key: All within comfortable reach with one hand. While it is common to place the camera

back in most other devices, PM351's 8MP camera is placed on top of the device next to the scan engine, making the switch from scanning to taking pictures feel more natural.

Configure the PM351 just as you need it

PM351 offers 1D and two 1D/2D engine options. The keypad comes in two types: Numeric and Alpha Numeric to choose from. While 3GB RAM/32GB ROM is standard, you can opt for the 4GB/64GB option if you're using a particular solution that consumes lots of memory. In addition, in case your work involves a lot of outdoor tasks such as delivery, PM351 also comes with optional LTE connecting it to the network anywhere anytime.

Well-rounded performance and durability

The 2.0GHz octa-core processor runs the Android 11 operating system smoothly, supporting any modern Android solution. The PM351 is one of the few enterprise devices supporting Wi-Fi 6 (ready), enabling fast and secure data transfer. 4,800mAh battery gets the device going all day without charging. With the operating temperature ranging from -20°C to 60°C, IP65 water/dust resistance, and 1.5m (5ft) drops to concrete durability, PM351 is suitable for any harsh industrial setting.

ENTERPRISE SOLUTION

SOTI, Airwatch, Teamviewer

Scan2Stage

PC tool for provisioning Point Mobile

Android devices. With Scan2Stage, IT administrator can prepare the settings of

the device and make QR code for Scan2Set.

EmKiosk Kiosk application for Point Mobile

devices. IT administrator can restrict the scope of the operator's system execution via EmKiosk to increase productivity and prevent distractions

Direct Clone Solution for restoring the devices to the

same settings with no internet connection. With Direct Clone, a Master PDA becomes a hotspot server and sends its backup file to nearby client devices to clone the settings.

PULS - ANDROID UPDATE & SECURITY

PULS is Point Mobile's lifetime solution, which extends the life cycle of Android-based Point Mobile enterprise devices to up to seven years after a product launch.

Patches, Updates & Lifetime Support

Stay up-to-date with the latest updates for 7 years PULS comes free of charge for security patches & updates Get the latest Android version and its newest features Conveniently update your devices in the field by FOTA

For further information, please visit www.pointmobile.com or contact your regional sales representative.

WARRANTY

Subject to the Terms and Conditions, PM351 carries 1 (one) year-warranty period from the date of purchase against the defective materials and manufacturing defects.
