SpeedFace-V5L   SpeedFace-V5L[TD]   SpeedFace-V5L[TI]

SpeedFace-V5L Series using intelligent engineering facial recognition algorithms and the latest computer vision technology. It supports Fingerprint, facial and palm verification with large capacity and speedy recognition, also the facial camera support QR code with Mobile APP, as well as improves security performance in all aspects.

SpeedFace-V5L Series adopts touchless recognition technology and masked individual identification which eliminates hygiene concerns effectively. It is also equipped with ultimate antispoofing algorithm for facial recognition against almost all types of fake photos and videos attack. Importantly, the 3-in-1 palm recognition (Palm Shape, Palm Print and Palm Vein) is performed in 0.35 sec per hand; the palm data acquired will be compared with a maximum of 3,000 palm templates. Besides, its facial camera supports QR code, PDF417, Data Matrix, MicroPDF417, Aztec, and so on, with ZKBioAccess IVS Mobile APP support Dynamic QR code for T&A/A&C .

The TD/TI Version with mask detection help reduce the spread of germs and help prevent infections straightly at each access point of any premises and public areas such as hospitals, factories, schools, commercial buildings, stations during the recent global public health issue with its masked individual identification funtion during facial and palm verification.

SpeedFace-V5L Series support video intercom Both via mobile app ZSmart and via PC software ZKBioTalk, also they are integrated ONVIF Video protocol,so that they can connect to Onvif NVR to Video surveillance and recording.
