

### INVENTORY MODULE

#### Overview

iCAPT Inventory is a module within iCAPT Manufacturing Automation System that allows manufacturers to simplify and automate their inventory operations through a real-time barcoding solution. It covers various inventory transactions from inbound, shop floor and outbound.

- Receipts
- Put Away
- Returns
- Stock Moves
- Misc. Receipts & Issues
- Inventory Count

- Job Receipts
- Job Matl. Issues
- Job Matl. Returns

- Pick and Ship
- Pick / Unpick
- Ship
- Returns

#### Value Proposition

Challenges	Value
Low inventory accuracy	Improved accuracy with reduced effort
High freight costs due to shortages	Improved profitability due by eliminating unplanned shipments
Material issuance errors	Improved profitability due by eliminating scrap
Too long to update data into ERP	Improved productivity due to real-time visibility into inventory

#### Pitch

*Achieve real-time inventory visibility*

*Improve transaction accuracy and reduce scrap/rework*

*Improve inventory accuracy*

#### Target Market

- Manufacturing companies (Discrete or Process)
- Having high levels of inventory
- Having many SKUs
- Sample verticals - metal fabrication, electronics, plastic injection molding, aerospace, automotive components, food and beverage, chemicals, etc.
