

THE MODERN MANUFACTURING WORKFLOW WEBINAR

New challenges arises from current COVID-19 pandemic driving more manufacturers to start their journey toward a digitalisation. Quarantine and social distancing policies had reduced the number of people working on Shopfloor, and delays on shipment have complicate the whole supply chains. Smarter data-driven factories help companies overcome some of these challenges and supporting workforce which become more remote recently.

Having visibility of Work-In-Progress and using that info to drive improvements is the key to modern manufacturing—and business in general these days. Join us to know more.
