

1 object 1 identity in production factory

Introduction

"1 object 1 identity" offer by AGen in a production factory is an easy to use system where each individual object or product manufactured in the factory is assigned with a unique identity or identifier (Common Malaysia practise is assign with QRCode). This identifier is used to track and trace the object throughout the production process and supply chain. The goal is to ensure that each product can be uniquely identified and monitored, which can be crucial for quality control, logistics, information retrieving and more.

What is the example of 1 object 1 identity?

- 1 bottle 1 ID
- 1 tin 1 ID
- 1 fruit 1 ID
- 1 box 1 ID
- 1 animal 1 ID
- 1 tree 1 ID
- 1 package 1 ID

Benefit of 1 object 1 Identity?

1. Distribution Location Tracking.
2. Product taste feedback
3. Product quality feedback.
4. Product, company and country introduction.
5. Discount to encourage buy more.
6. Duplicate discovery
7. Warranty claim
8. Product application information gathering.
9. Product Authenticity
10. Material source tracing
11. Supplier tracing.
12. Staff tracing.
